

AARYA SRIVASTAVA

Data Analyst • Python • SQL • Tableau • Power BI • Looker Studio

Delhi NCR | aaryasr0217@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Aspiring Data Analyst and 2nd-year B.Tech (CS & AI) student skilled in data analysis, EDA, and visualisation. Proficient in Looker Studio, Power BI, and Tableau for building dashboards that uncover trends and support data-driven decision-making. Experienced in end-to-end analytics pipelines — from raw data preprocessing and statistical analysis to predictive modelling and interactive dashboard delivery.

TECHNICAL SKILLS

Languages:	Python, SQL
Libraries:	Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn
Visualization:	Tableau, Power BI, Looker Studio
Databases:	PostgreSQL, MongoDB
Tools:	Excel, Google Sheets, Google Colab
Other:	Statistics, Data Cleaning, EDA, Feature Engineering, Predictive Modeling, Dashboarding

PROJECTS

Customer Churn Intelligence

Python • Jupyter Notebook • Tableau • Pandas • Scikit-learn

- Built an end-to-end churn prediction pipeline on telecom customer data; performed EDA to identify key churn drivers including contract type, tenure, and monthly charges.
- Engineered features and trained classification models; delivered a Tableau dashboard visualising churn segments, risk scores, and retention opportunity zones.
- Structured project across data, notebooks, scripts, and reports directories for reproducibility and team collaboration.

Global OTT Content Strategy Insights

Excel • Pivot Tables • Dashboard • Data Cleaning

- Cleaned and standardised raw OTT catalogue data across multiple streaming platforms; structured into analysis-ready format using Excel and pivot tables.
- Built interactive Excel dashboard summarising content mix, regional distribution, and genre trends to support global content strategy decisions.
- Produced documentation and presentation deliverables covering methodology, key findings, and strategic recommendations for OTT content investment.

House Price Prediction — King County, Washington

Python • Scikit-learn • Pandas • Matplotlib • Streamlit • Joblib | Role: Model Evaluation

- Designed a complete ML regression pipeline on 4,600 King County house sales; evaluated Linear Regression, Random Forest, and Decision Tree models with MAE, RMSE, and R^2 metrics.
- Linear Regression achieved $R^2 = 0.742$ (MAE \$87,505), outperforming ensemble methods; identified `sqft_living` as the top predictor contributing ~51% feature importance.
- Implemented strict train-test split, one-hot encoding for 44 cities and 77 ZIP codes, and `StandardScaler` — all leakage-free; serialised final model via `Joblib` for `Streamlit` deployment.

EDUCATION

B.Tech — Computer Science & Artificial Intelligence

Rishihood University (Newton School of Technology), Sonipat 2024 – 2028 (Expected) CGPA: 7.0 / 10

ACHIEVEMENTS & CERTIFICATIONS

- Delivered 3 end-to-end analytics projects independently, covering the full pipeline: raw data preprocessing → EDA → statistical analysis → predictive modelling → interactive dashboard.
- 2nd Prize — Deepsight Challenge 2026, Bennett University Noida | [View Certificate](#) ■
